

branching.SingBrModPt.set
Parameters

```
graph LR; A["branching.SingBrModPt.set  
Parameters"] --> B["util.StringUtil.isFlag"]; A --> C["branching.SingBrModPt.reset  
Overlaps"]
```

The diagram illustrates a call to the `setParameters` method of the `branching.SingBrModPt` class. This method call is shown as a gray box on the left. Two blue arrows originate from the right side of this box, pointing to two other boxes on the right. The top arrow points to a box containing `util.StringUtil.isFlag`, and the bottom arrow points to a box containing `branching.SingBrModPt.reset` and `Overlaps` on two lines.

util.StringUtil.isFlag

branching.SingBrModPt.reset
Overlaps
