

input.GetValue.get1Complex

input.CommandStrParser.jexecute

complex.Complex.string2Complex

```
graph LR; A[input.GetValue.get1Complex] --> C[complex.Complex.string2Complex]; B[input.CommandStrParser.jexecute] --> C;
```

The diagram illustrates a data flow where two separate input operations, 'input.GetValue.get1Complex' and 'input.CommandStrParser.jexecute', both feed into a single processing step, 'complex.Complex.string2Complex'. The input boxes are white with black borders, while the output box is gray with a black border. Blue arrows indicate the direction of the flow from the inputs to the output.
