

JPanel

Scrollable

fauxScript.FWSJPanel

```
classDiagram
    class JPanel
    class Scrollable
    class fauxScript_FWSJPanel["fauxScript.FWSJPanel"]
    JPanel <|-- fauxScript_FWSJPanel
    Scrollable <|-- fauxScript_FWSJPanel
```

The diagram illustrates a class hierarchy. At the top, two boxes represent the parent classes: 'JPanel' on the left and 'Scrollable' on the right. Below these, a third box represents the child class 'fauxScript.FWSJPanel'. A horizontal line connects the bottom of the 'JPanel' and 'Scrollable' boxes. From the center of this line, a vertical line descends to the top of the 'fauxScript.FWSJPanel' box. From the point where the vertical line meets the horizontal line, two arrows point upwards: one to the bottom of the 'JPanel' box and one to the bottom of the 'Scrollable' box, indicating that 'fauxScript.FWSJPanel' inherits from both 'JPanel' and 'Scrollable'.
