

JFrame

ActionListener

frames.ScreenCtrlFrame

```
graph BT; ScreenCtrlFrame[frames.ScreenCtrlFrame] --> JFrame[JFrame]; ScreenCtrlFrame --> ActionListener[ActionListener];
```

The diagram illustrates a class hierarchy where the `frames.ScreenCtrlFrame` class inherits from both the `JFrame` class and the `ActionListener` interface. The `JFrame` and `ActionListener` boxes are positioned at the top, while the `frames.ScreenCtrlFrame` box is at the bottom. A horizontal line connects the two top boxes, with vertical lines extending downwards from its center to the top of the bottom box. From the top of the bottom box, two arrows point upwards to the bottom of the `JFrame` and `ActionListener` boxes, indicating the inheritance relationship.
