

listManip.VertList.toFaceLink

listManip.VertList.toNodeLink

listManip.VertList.VertList

listManip.VertList.VertList

```
graph LR; A[listManip.VertList.toFaceLink] --> D[listManip.VertList.VertList]; B[listManip.VertList.toNodeLink] --> D; C[listManip.VertList.VertList] --> D;
```

The diagram illustrates a mapping or transformation process. On the left, there are three rectangular boxes, each containing a text string. Arrows from each of these boxes point towards a single, larger rectangular box on the right. The top box contains 'listManip.VertList.toFaceLink', the middle box contains 'listManip.VertList.toNodeLink', and the bottom box contains 'listManip.VertList.VertList'. The box on the right, which is shaded gray, also contains the text 'listManip.VertList.VertList'. This suggests that the three methods or components on the left are being consolidated or mapped to the single entity on the right.
