math.group.GeneratorType
Group.addGeneratorWithInverse

```
graph LR; A["math.group.KleinianGroup.add<br/>Mobius"] --> D["math.group.GeneratorType<br/>Group.addGeneratorWithInverse"]; B["math.group.Schottky.compute<br/>Generators"] --> D; C["math.group.KleinianGroup.set<br/>Mobius"] --> D;
```

The diagram illustrates a dependency or mapping from three source functions to a single target function. Three light gray boxes on the left, each containing a function name and a parameter, have blue arrows pointing to a single dark gray box on the right. The target box contains the function name and a method name.
