EuclCircles

posting.PostParser.postParse

packing.CPdrawing.drawIndex

```
graph LR; A["canvasses.DisplayParser.disp  
Parse"] --> D["packing.CPdrawing.drawIndex"]; B["deBugging.DCELdebug.draw  
EuclCircles"] --> D; C["posting.PostParser.postParse"] --> D;
```

The diagram illustrates a flow of data or control from three separate components on the left to a single component on the right. The three source components are arranged vertically: 'canvasses.DisplayParser.disp Parse' at the top, 'deBugging.DCELdebug.draw EuclCircles' in the middle, and 'posting.PostParser.postParse' at the bottom. Each source component is enclosed in a white rectangular box with a black border. Blue arrows originate from the right side of each of these three boxes and point towards a single target box on the right. The target box, 'packing.CPdrawing.drawIndex', is shaded gray with a black border and is positioned to receive input from all three sources.
