

JPanel

ActionListener

panels.LocListPanel

```
graph BT; panels.LocListPanel --> JPanel; panels.LocListPanel --> ActionListener;
```

The diagram illustrates a class hierarchy. At the top, there are two boxes labeled 'JPanel' and 'ActionListener'. Below them, centered, is a box labeled 'panels.LocListPanel'. Two arrows originate from the 'panels.LocListPanel' box and point upwards to the 'JPanel' and 'ActionListener' boxes, indicating that 'panels.LocListPanel' inherits from both 'JPanel' and 'ActionListener'.
