

JPanel

MouseListener

panels.MyToolBar

```
classDiagram
    class JPanel
    class MouseListener
    class panels_MyToolBar["panels.MyToolBar"]
    JPanel <|-- panels_MyToolBar
    MouseListener <|-- panels_MyToolBar
```

The diagram illustrates a class hierarchy. At the top, two boxes represent the parent classes: 'JPanel' on the left and 'MouseListener' on the right. Below these, a third box represents the child class: 'panels.MyToolBar'. A horizontal line connects the bottom of the 'JPanel' and 'MouseListener' boxes. From the center of this line, a vertical line descends to the top of the 'panels.MyToolBar' box. From this vertical line, two arrows point upwards: one to the bottom of the 'JPanel' box and another to the bottom of the 'MouseListener' box, indicating that 'panels.MyToolBar' inherits from both parent classes.
