

JPanel

ChangeListener

panels.ScreenPanel

```
graph BT; subgraph Top; direction LR; JPanel; ChangeListener; end; panels.ScreenPanel --> JPanel; panels.ScreenPanel --> ChangeListener;
```

The diagram illustrates a class hierarchy. At the top, two boxes represent the classes 'JPanel' and 'ChangeListener'. Below them, a box represents the class 'panels.ScreenPanel'. Two arrows originate from the 'panels.ScreenPanel' box and point upwards to the 'JPanel' and 'ChangeListener' boxes, indicating that 'panels.ScreenPanel' inherits from both 'JPanel' and 'ChangeListener'.
