

parser.Evaluator.findFunction

parser.Evaluator.isOperand

parser.Evaluator.isVariable

parser.Evaluator.isFunction

```
graph LR; A[parser.Evaluator.findFunction] --> D[parser.Evaluator.isFunction]; B[parser.Evaluator.isOperand] --> D; C[parser.Evaluator.isVariable] --> D;
```

The diagram illustrates a flow or dependency where three separate functions on the left (findFunction, isOperand, and isVariable) all point to a single function on the right (isFunction). The boxes on the left are white with black borders, while the box on the right is gray with a black border. Blue arrows connect each left box to the right box.
