

dcel.PackDCEL.layoutFactory

posting.PostParser.postParse

posting.PostFactory.post
FilledColorCircle

```
graph LR; A[dcel.PackDCEL.layoutFactory] --> C[posting.PostFactory.post FilledColorCircle]; B[posting.PostParser.postParse] --> C;
```

The diagram illustrates a dependency or mapping between two source components and a single target component. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'dcel.PackDCEL.layoutFactory' and the bottom box contains 'posting.PostParser.postParse'. On the right, there is a single gray rectangular box with a black border containing the text 'posting.PostFactory.post' followed by 'FilledColorCircle' on a new line. Two blue arrows originate from the right side of the top and bottom white boxes and point towards the left side of the gray box, indicating that both source components contribute to or are used by the target component.
