

ftnTheory.ProjStruct.cmd
Parser

input.CommandStrParser.jexecute

rePack.EuclPacker.affinePack

```
graph LR; A[ftnTheory.ProjStruct.cmd Parser] --> C[rePack.EuclPacker.affinePack]; B[input.CommandStrParser.jexecute] --> C;
```

The diagram illustrates a data flow where two separate inputs, 'ftnTheory.ProjStruct.cmd Parser' and 'input.CommandStrParser.jexecute', are combined and passed to a single processing block, 'rePack.EuclPacker.affinePack'. The inputs are shown in white boxes on the left, and the output block is a grey box on the right. Blue arrows indicate the direction of the flow from each input to the output.
