

JPanel

Scrollable

script.StackArea

```
classDiagram
    script.StackArea --> JPanel
    script.StackArea --> Scrollable
```

The diagram illustrates a class hierarchy where `script.StackArea` is a subclass of both `JPanel` and `Scrollable`. A horizontal line connects the two parent classes, with a vertical line descending from its center to the child class box. Arrows point from the child class to each of the parent classes, indicating inheritance.
