

script.TextSBox.acceptEdit

script.TextSBox.cancelEdit

script.TextSBox.startEdit

script.TextSBox.redisplaySB

```
graph LR; A[script.TextSBox.acceptEdit] --> D[script.TextSBox.redisplaySB]; B[script.TextSBox.cancelEdit] --> D; C[script.TextSBox.startEdit] --> D;
```

The diagram illustrates a flow where three distinct methods—`script.TextSBox.acceptEdit`, `script.TextSBox.cancelEdit`, and `script.TextSBox.startEdit`—all converge to trigger a single method, `script.TextSBox.redisplaySB`. The source methods are contained within white rectangular boxes, while the target method is highlighted in a gray box. Blue arrows indicate the directional flow from each source method to the target method.
