

tiling.TileBuilder.sewOneSlit

tiling.TileBuilder.swallow
OneUnigon

tiling.TileBuilder.update
TileVerts

```
graph LR; A[tiling.TileBuilder.sewOneSlit] --> C[tiling.TileBuilder.update TileVerts]; B[tiling.TileBuilder.swallow OneUnigon] --> C;
```

The diagram illustrates a relationship between three methods in the `tiling.TileBuilder` class. On the left, two white rectangular boxes represent source methods: `tiling.TileBuilder.sewOneSlit` (top) and `tiling.TileBuilder.swallow OneUnigon` (bottom). On the right, a gray rectangular box represents the target method: `tiling.TileBuilder.update TileVerts`. Two blue arrows point from the source methods to the target method, indicating that both `sewOneSlit` and `swallow OneUnigon` call or delegate to `update TileVerts`.
