

input.CommandStrParser.jexecute

util.ViewBox.ViewBox

util.ViewBox.reset

```
graph LR; A[input.CommandStrParser.jexecute] --> D[util.ViewBox.reset]; B[util.ViewBox.ViewBox] --> D;
```

The diagram illustrates two call paths to the `util.ViewBox.reset` method. The first path originates from `input.CommandStrParser.jexecute`, and the second path originates from `util.ViewBox.ViewBox`. Both paths are represented by blue arrows pointing to the `util.ViewBox.reset` node, which is shaded gray.
