

`complex.MathComplex.absSq`

```
graph LR; A[complex.MathComplex.absSq] --> B[complex.Complex.imag]; A --> C[complex.Complex.real];
```

The diagram illustrates the relationship between the `absSq` property of `complex.MathComplex` and the `imag` and `real` properties of `complex.Complex`. A gray box on the left contains the text `complex.MathComplex.absSq`. Two blue arrows originate from the right side of this box. The top arrow points to a white box containing `complex.Complex.imag`. The bottom arrow points to a white box containing `complex.Complex.real`. This indicates that the `absSq` property is calculated based on the squares of the real and imaginary parts.

`complex.Complex.imag`

`complex.Complex.real`
