```
graph LR; A["listManip.FaceLink.addFace Links"] --> D["input.SetBuilderParser.get SpecVector"]; B["listManip.NodeLink.addNode Links"] --> D; C["listManip.TileLink.addTile Links"] --> D;
```

The diagram illustrates a data flow where three separate source components on the left converge into a single target component on the right. The source components are 'listManip.FaceLink.addFace Links', 'listManip.NodeLink.addNode Links', and 'listManip.TileLink.addTile Links'. Each source component is represented by a white rectangular box with a black border. The target component is 'input.SetBuilderParser.get SpecVector', represented by a gray rectangular box with a black border. Three blue arrows originate from the right side of each source box and point towards the left side of the target box, indicating the direction of the data flow.
