

rePack.HypPacker.maxPack

packing.PackData.repack_call

rePack.RePacker.genericRePack

```
graph LR; A[rePack.HypPacker.maxPack] --> C[rePack.RePacker.genericRePack]; B[packing.PackData.repack_call] --> C; C --> C;
```

The diagram illustrates a flow where two separate inputs, 'rePack.HypPacker.maxPack' and 'packing.PackData.repack_call', are combined and fed into a single processing block labeled 'rePack.RePacker.genericRePack'. This block is highlighted with a gray background. A blue curved arrow on top of the 'rePack.RePacker.genericRePack' box indicates a self-loop or recursive call within the function.
